B-702

【Introduction】

B–702 is a single–pack with strong cvanoacrylate adhesive, curing fast, adhesion hard, creep and good hysteresis. B702 is suitable for lots bonding materials, easy to use. The characteristics of temperature and moisture resistance are weak.

B–702 is especially suitable for have applications with no temperature curing conditions. B–702 adhesive is suitable for resistance strain gages, compensation resistor and terminal bonding, except for TJ series underwater strain gages, BAB, BB series midtemperature strain gages; used for general accuracy and short term stress analysis.

【Characteristic】

- **Operation temperature range**: –30℃ ~ +60℃
- **Storage method**: seal storage in a cool dry place
- **Before mixing**: 6 months storage life under the degree of 24℃ ; 12 months storage life under the degree of 4℃ ;
- **Curing method**: press and rom temperature curing
- **Inflate**: press 1 minute by finger

【Packing Specification】

2 g/ bottle
